

Math Prep Workshops at PRC

*ALL STUDENTS AT COLLIN COLLEGE
ARE INVITED TO ATTEND*

When: **Saturday, February 1, 2020** from 9 am – 1:30 pm. Each workshop lasts 60 minutes.

Where: **Lawler Hall building – LH 165, LH 177, LH 178**

No registration required!

	Room 1 – LH 165	Room 2 – LH 177	Room 3 – LH 178
9:00 am	TI Graphing Calculator Basic Skills	Review of Beginning Algebra	Review of College Algebra
10:10 am	TI Graphing Calculator Beyond the Basics	Review of Intermediate Algebra	Review of Trigonometry
11:20 am	Review of Beginning Algebra	Review of College Algebra	Review of Pre-Calculus
12:30 pm	Review of Intermediate Algebra	TI Graphing Calculator Basics and Beyond	Review of College Algebra

TI Graphing Calculator Basic Skills: This workshop will present basics of using a TI graphing calculator. Recommended for students taking Math 0302, 0405, 0305, 0310, 1332, 1314, 1324

TI Graphing Calculator Beyond the Basics: This workshop will present skills for using a TI graphing calculator for trigonometric, rational, logarithmic, and exponential functions. Recommended for students taking Math 1325, 2412, 2413, 2414

Review of Beginning Algebra: This workshop will be a review of order of operations, signed numbers, exponents, linear equations, and operations of polynomial expressions. Recommended for students taking Math 0310, 1332, 1314, 1324

Review of Intermediate Algebra: This workshop will be a review of graphing linear equations, slopes, solving systems of linear equations, factoring, solving quadratic and rational equations. Recommended for students taking Math 1314, 1324, 1325, 1316, 1350, 1351

Review of College Algebra: This workshop will be a review of the difference quotient, compositions of functions, inverse functions, piecewise-defined functions, and exponential and logarithmic expressions and equations. Recommended for students taking Math 1325, 1316, 1350, 1351, 2412, 2413, 2414

Review of Trigonometry: This workshop will be a review of the unit circle, reciprocal identities, quotient identities, Pythagorean identities, and inverse trigonometric functions, right triangle trig, and solving trig equations. Recommended for students taking Math 2412, 2413, 2414

Review of Pre-Calculus: This workshop will be a review of graphs of trigonometric functions, right triangle trigonometry, and trigonometric identities. Recommended for students taking Math 2413, 2414, 2415
